

STRELA 2M / 9K 32/ SAM – 7 GRAIL

Strela 2M is lightweight personal, portable surface to air rocket system with highly explosive warhead and passive infrared guidance system.

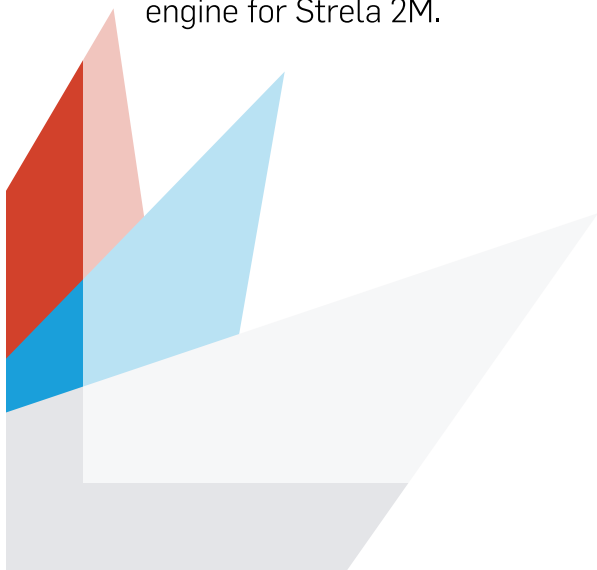

Modification of Strela 2M was proven successful in 1970. and since then Strela 2M has been in regular production.

THE FOLLOWING IMPROVEMENTS HAVE BEEN INTRODUCED

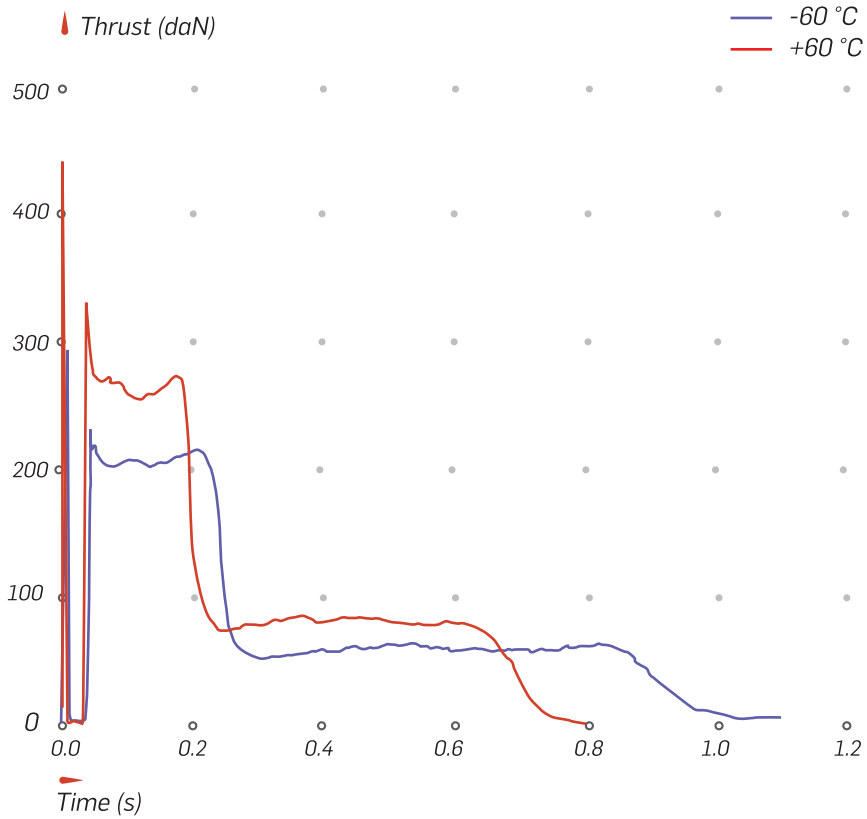

Higher thrust of rocket engine has increased rocket range from 3,4 to 4,2 km and maximum height from 1,5 to 2,3 km.

Improved guidance and control enabled this rocket to shoot slower targets such as propeller driven airplanes and helicopters.

Company EDePro has successfully designed, developed and tested new composite rocket engine for Strela 2M.

Flight motor "STRELA M" (Main motor)
