

Learning and innovation-based culture to meet tomorrow's challenges

I would like to personally welcome you to EDePro corporate website, the home of Eastern European leaders in cutting-edge defense and security solutions. With over thirty-year long tradition, from a university-based laboratory, our company has undergone a remarkable evolution and exciting journey, pioneering advances in scientific research, innovation, and technological ingenuity, as we've pursued our vision to become the synonym for groundbreaking technologies in defense and related industries.

Today, EDePro is recognized as a globally renowned company, and - one of the key engineering hubs for research, development, production, trade, and modernization of the rocket systems, artillery munitions, and defense equipment in this part of the world.

Fostering an environment of technological empowerment, our outcomes power answering the most important today's and tomorrow's defense challenges in an ever-changing world. Driven by this purpose since the establishment of the company, we are delivering premium quality, innovative, cost-effective solutions, products, and services for our worldwide client base.

On the track of the fourth industrial revolution that we are witnessing, at EDePro we believe that the development of societies lies in tech intensity, scientific discovery, knowledge, and skills that foster innovation, reducing differences defined by previous industrial revolutions, and thus economic development. Knowledge-based economy and coping with the change of pace of high-tech globalization have become the most significant elements of societal progress nowadays.

As a company with far-reaching implications for the economy, we remain focused on strong contribution to the industrial development and competitiveness of Serbia on the global scale, which is why our strategic path includes constant and strong support to education and science development. By sharing our extensive knowledge in academia and research centers, we strive to contribute to creating generations of top-class engineers equipped with skills to respond to 21st-century challenges. It is only through close cooperation of industry and education that we can reach excellence in both fields and find our place on the world's industrial and technological map.

Accordingly, within EDePro today we are committed to learning-based culture and operations, where our people have been and always will be our greatest asset that enables us to reshape our industry and make our company even better, year after year. Our ambitious vision for the company's future lies in our capability to transform, extend our already strong results, and detect new opportunities where our performance can find improvement, while constantly adapting to meet the changing needs of clients and society as a whole.

We have achieved a lot over the past decades and I strongly believe that for EDePro the future holds even more - to lead the industry technological trends of tomorrow, sustainable growth, safety, and progress of our customers, our employees, partners, institutions, and communities.

Welcome to EDePro!

Sincerely,

BRANISLAV JOJIĆ, Founder and CEO of EDePro Company
