

A Learning and Innovation Culture That Meets Tomorrow's Challenges

I would like to personally welcome you to EDePro corporate website, the home of Eastern European leader in cutting-edge defence and security solutions. In 30 years, from a university-based laboratory, our company has undergone a remarkable evolution and exciting journey, pioneering advances in scientific research, innovation, and technological ingenuity, as we've pursued our vision to become the synonym for ground-breaking technologies in defence and related industries. Today, EDePro is recognized as a globally renowned company, and - one of the key engineering hubs of research, development, production, trade, and modernization of the rocket systems, artillery munitions, and defence equipment in this part of the world. By employing empowerment technology since our company's establishment, we can rise to the most important defence-related challenges, both present and future, and we deliver innovative, premium-quality and cost-effective designs, products and services for our worldwide client base.

During the ongoing Fourth Industrial Revolution, we believe that the development of societies lies in knowledge and skills, especially those that foster innovation, scientific discovery and tech intensity - because they reduce the differences defined by previous industrial revolutions. Nowadays, knowledge-based economy, as well as adapting to the technological globalisation's change of pace, are the most significant elements of social progress. As a company that is closely involved in the economy, EDePro remains focused on contributing towards Serbia's industrial development and global competitiveness. This is why our strategic path includes providing a strong and constant support to education and scientific development.

By sharing our extensive knowledge in academic and research centres, we also contribute towards creating new generations of top-class engineers with skills in responding to the present challenges. It is only through the close cooperation of industry and education that we can reach excellence in both fields and put our company on the world's industrial and technological map.

Moreover, EDePro is committed to encouraging a learning culture and its activities. Our employees are and always will be our greatest asset that enables us to constantly improve our company and reshape our industry. Our ambitious vision of the company's future stems from our capability to achieve even better results, and detect new opportunities to improve our performance, while continuously adapting to meet the clients' and the society's changing needs. We have achieved many objectives over the past decades and I strongly believe that we can achieve even more in the future - reinforcing the future technological and industry trends, maintaining sustainable growth, improving safety and making progress on behalf of our customers, employees and partners, as well as our institutions and communities.

Welcome to EDePro!

Sincerely,

Prof. dr Branislav Jojić

founder and CEO of EDePro
